

Ringtone instructions - PC

Download the ringtone:

1. Right click the link and click "Save target as" / "Save link as"
2. Select to save the ringtone to your desktop

Ringtone

[Download](#)

Transfer the ringtone to your mobile phone: (differs from mobile handset to handset)

1. Connect your mobile phone to the computer via a compatible USB cable (usually supplied with the mobile phone) or activate the Bluetooth connection on the computer
2. Access your mobile phone
3. Copy the ringtone file and paste it into the folder of your mobile phone

Using Nokia PC Suite

<http://www.nokia.com.au/get-support-and-software/download-software/nokia-pc-suites/how-to/manage-files>

1. Open the main window of Nokia PC Suite and select File manager application.
2. The File manager opens a Windows Explorer window showing your device in the drivers list. Your device and its memory card appear as two separate drives.
3. You can browse the device contents just like you would browse folders in Windows Explorer.
4. Copy the ringtone file from your desktop and paste it into your device drive.

If you are unsure about what option is right for your phone, please contact your service provider who will be able to talk you through the download process.
